

Revolution™

Professional Security RMS and Report Software A solution for Security Professionals

The face of private security is changing daily. The way you do business has become more competitive and complicated. More than ever, your reputation is at issue with every contact your guards make, and most times an hour delay in notifying a client can be too long. Clients demand perfection from their security agencies, and Revolution™ is here to help.

Revolution™ makes doing business simple. Because of our web-based architecture, your RMS and report writing solution is connected to your network for immediate real time results. Revolution also provides very affordable 24/7 network service if you need it. Because Revolution™ is multi platform, you will be able to connect your laptop, desktop, smart phone or tablet devices without a problem.

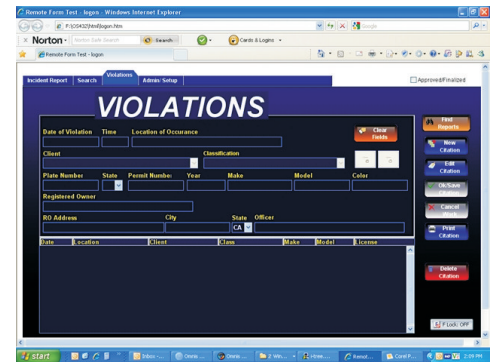

Making friends is your business

Clients are a demanding bunch, and we understand that a few incidents of slow

response to a client's request can mean loss of business. Revolution™ puts your best foot forward by arming you with several reporting tools, designed to impress your clients. An e-mail client allows you to attach an actual report in your daily client advisories. You can select to have each client notified of every incident on their property at the end of each day. Imagine, telling them what they want to know, before they have to call and ask for it!

Revolution's™ added features include:

- Secure log-in for every employee.
- Automated intelligent fields.
- Supervisor can approve a report, or kick it back for correction.
- In car HOA completion and print out.
- Search your database for persons, vehicles, addresses and clients.
- Web based interface can be used by any computer anywhere.
